## The Epidemics!

Friday, March 7 2:30pm-5:30pm

Every time we walk into the treatment room changing demographics, shifting social mores, diverse cultures, emerging diseases, complex medical histories and our aging population challenge the judgment and clinical skills of even the most seasoned dental professional. Physical disease and social phenomena create new epidemics that transform how we practice. Get down to basics with news you can use on Monday.

Switch on your investigator antennae, heighten your sixth sense of intuition and develop effective diagnostic and communication skills for a diverse set of issues. Toss out the myths and learn how a variety of problems can have similar impacts on oral health, delivery of care and treatment outcomes. Identify effective ways to work with some of this century's most complicated patients.

- Autism – Unlocking the doors, connecting and communicating.
- Can you hear me now? – Maximizing moments with hard-of-hearing patients.
- Meth mouth – The addiction that melts teeth and destroys lives.
- Soft drink junkies – Teeth, bones and body fat.
- Working in pain? Playing victim or surviving your circumstances.
- Body art and piercings – Non-judgmental straight talk.
- Is your grandmother going to college or forgetting what she ate five minutes ago? Working with senior patients.
- Oral lesion detection – Failing to see reality.
- Xerostomia - The ultimate desert storm battle.
- Sickening facts - Diabetes, obesity, osteoporosis and eating disorders.

## Battling Biofilms and Other Hot Hygiene Topics

Saturday, March 8 8:30am – 3:30pm

Recent advancements in science and technology impact every aspect of our lives today, from the treatment room to the bathroom. Are we destined to practice dental hygiene just as we were taught? Or can we incorporate new ideas into our daily routines---ideas that can improve patient evaluation skills, enhance treatment modalities, and augment our recommendations. New thoughts keep our clinical and professional perspectives fresh and challenging. Come supercharge your career with information that you can put into practice the next time you pick up a mouth mirror.

- What is a biofilm and how does it form?
- Biofilm based dental disease – how do we treat it?
- Visualizing biofilm
- Disrupting and removing biofilm with ultrasonic scalers
- Dealing with biofilm daily with today's power brushes
- Dental unit water line biofilm issues
- Ergonomic equipment – can it reduce your aches and pains?
- Are repetitive stress disorders inevitable or preventable?
- Selecting products that make clinical practice easier or more fun
- In office and home care products that make patients say wow!

**Anne Nugent Guignon, RDH, MPH**

Ms. Guignon is an internationally recognized speaker and author. Her information about ergonomics, ultrasonics, new products and patient comfort is timely, straightforward, practical and fun. She received her BS in Dental Hygiene in 1971 from the University of Missouri-Kansas City School of Dentistry. Anne conducted graduate research for her master's degree in the areas of dental hygiene career satisfaction and continuing education activity at the University of Texas School of Public Health. She writes a monthly column for RDH Magazine and is the Senior Consulting Editor. Anne writes feature articles for many publications, has authored textbook chapters on ergonomics and power driven scaling, and holds an adjunct faculty position at the University of Texas Dental Branch in Houston. Anne has practiced in Houston continuously since 1971, is an active member of ADHA and received the Sonicare-RDH Mentor of the Year Award in 2004.
